Volume 19, Number 10

Canadian talent to perform at WLU's Head's Dinner.

Don Cullen

by Susan Rowe

Winner of CBC's 1977 ACTRA Award

"Best Variety Performer in Broadcast-

ing, actress and singer-songwriter, and

 Canadians White, and TV, radio and stage

on, actor, host, director and producer.

Don Cullen will be

Chair in Toronto and is reles-

as a variety show on Fox. She

inh the Triple Ho to entertain

on, will host a TV Ontario sculp,

'woman', a singing and song com-

plays and directed shows for

radio's Sunday Morning, giving

across Canada, and

involved in centuring for

Is My Mother Talking Me, which

Cullen has written over 150

programs for TV including con-

tributing to several WLU and Pay-

Thirty programs, over 100

radio programs primarily for

C.B.C. Network, and many stage

shows including "Beyond the

Fringe". He has hosted and ac-

- presented TV shows, notably in

Wayne and Shuster specials. In

addition to acting for C.B.C.

TV, CTV Network, I.B.C. TV and

DECA TV, in numerous com-

mercial, films and film specials for

TV and on stage. As a stage and

teaching director, her work has

produced many comic ma-

, having founded and operated the Ro-"

lheatre Company. Miss Cullen

is a popular host for carnivals and

Ss

If you want to see these excep-

mantly performers, why not make

plans to attend the Boar's Head

Dinner, which will be held on

Monday, December 4, 1978 at

7 p.m. in the Theatre Audito-

rium. Tickets are now on sale in

the W.L.U. office, the prices

being 50 cents for on-campus

students with meal cards, and

$4.00 for anyone off-campus.

With a seating capacity of

300 in the 7, tickets will be

scarce, so be sure to get one

soon. Whereas last year, waiters

and waitresses served the meal,

the honor is reserved for those

this year, who have already been selected.

This year marks the 28th An-

nual Boar's Head Dinner at W.L.U., although the idea began back in the fourteen-

teenth century. The story goes that on one fine day, a philosophy student, Capcot,

- student of Queen's University at Oxford and Capcot, who was attending a monastic

in England, had escaped into the forest in order to found a new city. He

- the philosophy Christmas

- the current policy is misleading. Certain

students in Ontario have failed to

demonstrate to students that the

"cutbacks" are as profoun-

d as any others. The best

The business of politics discussed on WLU day

by Barry Ries

Jim Breithaupt, MPP for Kitchener, spoke on "The Business of Politic" as an attraction for WLU Day Thursday. Recent reports of a twenty-five or thirty interred high school students, WLU students, and faculty that turned out.

Breithaupt is a fairly well known provincial politician. In addition to his duties as Liberal MPP for Kitchener for the past 11 years, he has been Chairman of the Public Accounts Committee, Chairman of the Select Committee on Company Affairs, and Chairman of the Liberal caucus with regard to policies and priorities.

Breithaupt spoke on some of the areas involved in present day politics, including the contemporary issues of an adopted child's right to information concerning his natural parents once he reaches the age of eighteen, and the question of the removal of pituitary glands from corpses that alienation of the child's right to information concerning his natural parents once he reaches the age of eighteen, and the question of the removal of pituitary glands from corpses.

Breithaupt said that the only way to stop the emigration of northern residents to the south is to have more temporary issues of governance. He added that industry in the north would probably remain than just 'law-makers'. He pointed out that the distances involved are considerable. Breithaupt pointed out that Rainy River is further from Toronto than Halifax. "No wonder they feel alienated," he said.

Breithaupt said that the idea of pituitary glands from corpses that alienation of the child's right to information concerning his natural parents once he reaches the age of eighteen, and the question of the removal of pituitary glands from corpses.

Breithaupt said that the idea of pituitary glands from corpses that alienation of the child's right to information concerning his natural parents once he reaches the age of eighteen, and the question of the removal of pituitary glands from corpses. He added that industry in the northern residents to the south is to have more temporary issues of an adopted university.

Toivo Miljan (Political Science) said that the idea of pituitary glands from corpses that alienation of the child's right to information concerning his natural parents once he reaches the age of eighteen, and the question of the removal of pituitary glands from corpses.

What does CUA mean? Read on to find out

If you have ever wandered past the TV lounge or the games room on the second floor of the Student Union Building, you may have noticed, as well as the Cord and Radio offices, the WLUSU office, which contains, among other things, the Commission of University Affairs. The COM, as its members affectionately call it, is responsible for the smooth running of the university and its students. The Commission is an advisory group that advises the administration on matters of concern to students. It is composed of seven members, five of whom are elected by the WLUSU and two appointed by the Board of Governors to represent the views of staff and faculty. The COM meets monthly to discuss issues of concern to the university community.

The COM is divided into three main committees: the Finance Committee, the Planning Committee, and the Policy Committee. The Finance Committee is responsible for reviewing the university's financial statements and ensuring that the university is adhering to its financial policies. The Planning Committee is responsible for reviewing the university's strategic plans and ensuring that they are aligned with the university's goals. The Policy Committee is responsible for reviewing the university's policies and ensuring that they are consistent with the university's mission.

The COM meets on a regular basis and its meetings are open to the public. The minutes of the meetings are available on the WLUSU website. The COM is an important body that plays a critical role in ensuring that the university is run in an efficient and effective manner.

The COM's role is to advise the administration on matters of concern to the university community. It is an important body that plays a critical role in ensuring that the university is run in an efficient and effective manner.

Keeping in the black will be a challenge in 1979

by Karen Kohn

As the income base for WLUs will be lower than the normal increase in inflation, preparing a balanced budget will be difficult for the next few years, said Miss Giesbrecht, Vice-President-Consolidation, at a recent meeting. She explained the financial guidelines established and the preparation of tentative budget of 1979-80.

Over the next few years, there will be serious review of all accounts. A number of them, which have not yet been so designated, will operate on zero-based budgeting. Each item will be scrutinized for real need, and there will be no automatic allocations. Miss Giesbrecht said zero-based budgeting is not appropriate for all accounts and it should only be used during a period of restraint. In a normal budget situation, programs are reviewed in general terms, and this is based on the experience of prior years. There usually is an increase of a certain per cent over the previous year's account.

The new policy of the Board of Governors that states "no allocation shall be pegged at a given per cent of the total budget" is deemed objective and fair by Miss Giesbrecht. It allows for expense accounts to be reviewed in a fair way and decisions can be made on the merits of a particular expenditure as required by current need. She feels the policy should be retained for future use.

At last week's Board of Governors meeting, WLUs explained the method by which variances can be accommodated. The income base for 1979 will only increase 4 or 5 per cent compared to a 9 per cent increase in inflation. Salaries can exceed a 4 or 5 per cent increase provided compensating budget adjustments are made. WLUs' only source of increase in revenue base will be an increase in government grants. In December, the Ministry of Colleges and Universities will inform WLUs of their increase in grants.

In 1979, there will be a departure from usual procedures because the preliminary model budget will be more adjustments than in previous years. WLUs' revenues and expenditures will be reviewed in general terms, and there will be no automatic adjustments. Miss Giesbrecht said no account will be set aside to be retained for future use.

At the end of the year, the preliminary model budget will be presented to the Commission, a report is prepared and presented to the Ministry of Colleges and Universities. There will be a formal procedure for presentation of the preliminary model budget. The new policy of the Board of Governors that states "no allocation shall be pegged at a given per cent of the total budget" is deemed objective and fair by Miss Giesbrecht. It allows for expense accounts to be reviewed in a fair way and decisions can be made on the merits of a particular expenditure as required by current need. She feels the policy should be retained for future use.

WLUs have been fortunate as they have a background of austerity, good budget procedures, and cooperation between faculty and staff. Miss Giesbrecht said no administration can establish a fair budget without help.

In her opinion, universities will become better institutions financially will be difficult, Miss Giesbrecht said no account will be set aside to be retained for future use.

**It's been a good couple of months**

Time is running out. There are 11 days of classes left, 28 days until the end of exams, and 26 shopping days before Christmas. If your year has been like mine, it's gone by pretty fast.

There have been several social events building up to this year's Queen's Claus parade, on behalf of the WLUSU planning Committee Students. As usual, Mr. Hoy, for having your column of November 14th. For those people who are unfamiliar with the January, former month of our readers are looking forward to exams and essays as much as we are. It's been a good couple of months.

**Car Insurance**

As an Independent Insurance Agent, I am unable to give the article on your car insurance (Cord, Nov. 16) (which is one of many I've read on the subject) quite accurate but needing an explanation for some of the rates raised. I hope to help extend my reply will serve a purpose, as we have a lot of good student business despite the following:

It is a fact that a homeowner has to pay school taxes when he has no children. This is somewhat an analogy or similar problem to the male driver vs. the young male driver, in that the money is coming from the many to pay for the expenses of the few.

Although the young male driver is accident and collision free, and pays twice as much as his female counterpart, his car insurance rates are based on previous experience and are somewhat of an "advertised guess" as compared to Life Insurance rates which are actually wound. A young male driver pays on the past experience of his counterpart pasts, and a woman the same, although the gap in rates is gradually closing with things happening between male and female drivers.

In many places we do not like to give rates over the phone as follows: A. A lot of callers are not really ready to buy and therefore are expecting a quick answer, yet our companies require answers to approximately 30 questions before we can give a firm quote. B. Young drivers in a university city such as ours are known to move often and move in and out of the area, often negating any profit we might make on the file if he had stayed for year or two.

Students often purchase only three or six-month policies, which, although we realize they are not blessed with funds, somewhat proves the point of instability as far as residence goes. They also change cars more frequently, require more paper-work, and have the family's business going. They also change cars more frequently, require more paperwork and increase in the family's business going. They also change cars more frequently, require more paperwork and increase in the family's business going.

It's been a good couple of months.

**Return Date?**

There have been many different and conflicting ideas on the "DATE" on which the students will be returning in January, either on the 2nd or on the 4th. As it stands now, we are returning on the 2nd. If you have any questions on this issue, drop in and see me, or to our readers. Give me a chance to listen to you, the students.

**Thank you, Kurt Ditner**

Tuition levels to be unpegged

Tuition fees at the University of Toronto and the provincial government's recommendations of a consulting firm it retained to study issues related to fee-setting have raised concern among some students and colleges.

The consulting firm, P.S. Ross Associates, is due to report its findings this month. The National Federation of Students of Canada has said it will study the report closely, and the government is expected to set its own fee levels.

The exact fee levels will be determined by the Ministry of Colleges and Universities.

Public statements by Dr. Ralph C. Butterfield, President of the University of Toronto, give an indication of the practical effect of such a move. Speaking at a forum sponsored by the Students Administrative Council at U of T on November 6, Dr. Han said that he favored requiring students to pay 50% of the cost of education. Other administrators have said they will have to make similar demands.

Requiring this level of payment would shoot tuition fees sky-high. The average U of T student would be paying $187 a year to go to any other institution in Canada.

But that is just the tip of the iceberg. Should fees be pegged to the cost of the student's program, tuition could constitute a crippling deterrent.

Medical students, for example, would be faced with tuition of $8,806 a year. (They currently pay $9,001.) A Masters of Science programme would run $8,071 (as against $4,401 currently). Ph.D. programs would mean a yearly tab of $3,100 (for $790).

A massive increase of this nature, combined with disqualification from student aid for graduate and professional students, would wipe away any dream of higher education for many.

"Unpegging" of tuition fee levels would also present a major crisis for smaller universities. They would be faced with a catch-22: keep tuition levels down and fail behind other schools in capacity to recruit teachers and improve facilities or raise fees and lose students. For small schools the P.S. Ross scheme would amount to a prescription for suicide in small doses.

Law and politics

by John Webster

It is interesting to note which politicians apply to our legal system and legal stand­ards. Fraser, meantime, is trying to cover up this province's troubles who doubles as a provincial government official. The provincial government intends to amend the Municipal Act to give towns and cities the power to legislate with regard to the legalities of their respective loca­tions.

Previously, the municipalities claimed not to enact legislation if alcoholic beverages were being sold. But most count on sup­port from various municipal governments. Attorney General E. McMurty has written Minister Otto Lang pro­posing the decision in the Keith Edwards case. Roy must ensure that not only hockey players respect legal order but other major entertainers as well. I think that one could make a case for non-moral behavior being an issue in professional sports. It would depend on one's definition of morality.

Ms. Smith started off with readings, which is done by the students in her class. This says psychiatry is like blood wells—this is to have called in December 1st meeting and Wednesday was all fresh. After 11 years and 3,000 meetings, she has clearly realized it was time to expand her presentations and chose the area of active research.

Her specialty is suicide—she says everyone has an aura and if everyone can learn to read aura (small children can do it naturally). She went on to describe it as an energy field around everyone, divided into various bands of various colours. The psychic claims these colors portray the person's personality—past and present. She also said that everyone has the potential to be psychic—it just has to be developed. Ms. Smith herself did not know she was psychic until her late teens, and thought she was going crazy till she discovered what it was.

I went into the room with an open mind—no expectations or previous conceptions. There were many curious seekers there as evidenced by the number of hands raised when she asked for all the "first timers". There was an incredible mixture of people there, almost as if someone had ordered one of everything.

Reggie's Corner

GOOD LUCK ON YOUR EXAMINATIONS!

We would like you to know that, for the first time, students will not have any final examination conflicts during the Fall Term examination period. Another plus, students taking courses in the evening can now write their examinations in the evenings or on Saturdays, not interfering with their normal working hours. We have scheduled all Fall Term final examinations in such a way as to have the finest possible number of concentrators.

The Fall Term examinations must all be scheduled within a two-week period, starting from December 9th and finishing on December 21st. Unavoidably, therefore, some examinations must occupy spaces toward the end of the examination period.

All the best, Reggie

Question of the Week

by Carl Friesen

Would you rather start classes on January 2nd or 3rd?

Verena Rogge

1st yr. Bus. and Ec.

I'd rather start classes on the 3rd. If we start on the 2nd, returning students will find trains and buses full of people who just went to New Year's weekend. Starting on the 3rd will also give time to be with family, friends and to get over hangovers.

Rick Ritz

3rd yr. Economics (Stud. Senator)

I favour starting classes on the 2nd, but one reason for not changing from 1978 is that it's already in the calendar. Changing it would present an image of confusion we want to avoid.

Mike Sutherland

The way it is now, some people will be travelling home for the holidays and, especially if they live farther away, and people shouldn't be forced to be in school during the holidays. We should change this for the next examination period.

Dr. Gary Weller

Chairman, English Dept.

I don't think that the loss of a single day of classes is really a disaster: profs could make it up. The vote to start on the 2nd was really swayed by the fact that the U of T is starting then, and there are a lot of students cross-registered who would have problems if the only university did not cooperate on starting dates.

Dr. John Finlay

Chairman, Dept. of Economics

I have no objection to starting classes on the 3rd, provided that students know what to expect. One day different from the U of W schedule would matter very much. There was some concern voiced in the Senate meeting that if classes start a day later, many students will not bother showing up at all that week. This would be more of an issue in 1980 when the 3rd of January is a Thursday.
Two Kitchener record stores have lowest prices in K-W area

by Kurt Ditner

For the last couple of weeks, I have been drifting around to different record stores. Comparing both the prices of different records and friendliness of the staffs. And I found that the prices are worth investigating between the Kitchener downtown and the Waterloo area.

The only way to get ahead of the rising prices is to shop around. In Waterloo, the record stores: 1) Shoppers, 2) Flip Flop and 3) Records on Wheels are leading with the cheapest. Prices 12 of the 16 albums surveyed were available at lower prices, and tied for the remaining you wanted to buy some or all of these albums for Christmas presents. You could theoretically save 97.4% if you bought these albums at their lowest price. One word of advice: shop around!

Let’s just say that you didn’t have any of these albums or that you wanted to buy them all at all of these albums for Christmas presents. You could theoretically save 97.4% if you bought these albums at their lowest price. One word of advice: shop around!

### Audio: A Critical View

Last week we spoke briefly about some of the different points to consider in the purchase of an amplifier. The other part of the system which we called the heart of the system is the pre-amp. This is the part of the system which usually has all the buttons, knobs, switches and other controls on it.

At the name would suggest, the pre-amplifier takes the signal before it reaches the main amplifier. This is done to give two main reasons. Firstly, the signal which your turntable, tape-deck or tuner put out is too small for the main amp to utilize. Secondly, the signal put out by these other units is far too small. This signal which comes out by these other units is for the most part at a constant level. This means that the sound you would get from your system would be at the same loudness at all times. By using a pre-amp stage one can amplify this signal to a level where it is of use to the main amplifier and one also can control the amount of boost and thereby control the level of output of the system in a whole. In the case of a turntable this amplification process is carried a step further. The signal which the cartridge in a turntable puts out is very small and thus what is called the phono stage of the pre-amp is utilized. This is probably the most critical part of the pre-amplifier since listening to the turntable will provide you with your critical listening periods. The quality of this pre-amplifier is what determines how you will listen to your system.

At Audio Design, what we have done is: considered all the parameters involved in designing audio equipment, eliminated the ones which do nothing but cost you money, and concentrated our efforts on the features and relevant specifications which lead to sonic excellence.

Madcats: Good bar-band rock at U of W

by Bob Simpson

The Madcats, one of Toronto's up and coming bands, gave a good 'n' flashy performance in both Campus Hall at the University of Waterloo last Friday. They mastered the expected deficits after a few things at the beginning guzzling good was pleased.

One of the Madcats was Gary, very well balanced, and full of energy. It could be felt in the gut. If they had any resemblance to another band, it was Foreigner, but by no means were they carbon copies. Their sound was also far from pedestrian with musical variations and melody lines in the guitar and synthesizer work.

The musicians that make up the Madcats played with various other bands before getting together 18 months ago. Bob Blake, on vocals and guitar, played with the Mike McKenna Band. Guitarist and Vocalist Grant Fullerton was one of the original members of Lighthouse, and was also with Storch in Time. Brad McDonald, on keyboards and vocals, was with Pile Driver, and bassist John Erdman has played with Joe Jo Gunn and Pacific Gas & Electric in the past.

Not one fan in the 16,000 seat Maple Leaf Garden "Concert Hall" last Friday was disappointed with the entire throbbing mass. During the concert all eyes were glued to the dark, distinct features that outlined the face of Bruce Springsteen.

Looking down through the smoke from our lofty vantage point, it was easy to see that the audience had succumbed to the man's magic even before his entrance. Flaming matches dotting the Turret Prices

by Kurt Döker

The Thursday night pubs which have been a tradition of the music community has been meeting with success this year. To keep this success going, one needs a level of attendance and a stirrings which has been sustained each week, so they will not go into the red. These pubs on Thursday Night are a service to you the student. I am not getting paid to type this statement. I am just trying to show you that no matter if you are coming here for high education or a meaningful relationship, the prices are a line very much cheaper than other entertainment in the Waterloo area.

If you can find a cheaper way to have fun and listen to a live band, drop up to the Turret this Thursday Night and have a chat with me, over a cold beer. Remember, also that the beer prices are only $0.50 and the liquor prices are $1.25. This is a perfect way to get a taste of the beer scene.

Bruce Springsteen—an explosive performance

Indeed, the same thens—lovers, the suppression of man-made boundaries by the darkness—occur throughout Springsteen's lyrics. These lyrics enabled him to penetrate the barrier that always exists between the singer and the audience, a barrier that must be broken in any successful performance. The feeling he inspired was in everyone. Only after three hearty encores was the audience glued to the dark, distinct features that outlined the face of Bruce Springsteen. The musicians that make up the Madcats played with various other bands before getting together 18 months ago. Bob Blake, on vocals and guitar, played with the Mike McKenna Band. Guitarist and Vocalist Grant Fullerton was one of the original members of Lighthouse, and was also with Storch in Time. Brad McDonald, on keyboards and vocals, was with Pile Driver, and bassist John Erdman has played with Joe Jo Gunn and Pacific Gas & Electric in the past.

States. The band's sound is completed by Glen Grasso on drums and vocals.

The Madcats released their first album, Madcats, in Canada last March, and have just been contracted by Budha Records, to release it in the U.S. Within the next week a single comes out titled "Woman's Got the Pow-
er." Also, the band has an upcoming gig at the Bottom Line in New York City, one of the biggest hot spots in the Big Apple.

There are limitations to a band like the Madcats. It would be hard to imagine them playing in anything but a bar. A band member stated that he wouldn't feel right unless he was playing to someone with a beer in his hand. Massey Hall or the Humanities Theatre wouldn't suit the stage performance. It's not their environment. A place like the El Mocambo or the O'Keefe would perfectly suit the nature of the band.

Author's Note: This year, I've been reviewing bands and concerts at U of W, not WLU, since there is nothing to review except the Thursday Night excuse for a pub. Why is there nothing else? Did the Burton Cummings fiasco (from a loss of $10,000) scare WLUSU away? I'm only writing for this area the Elora Mill Restaurant and Inn.

Elora Mill
Restaurant and Inn

ONE of Ontario's oldest grist mills now completely restored as a restaurant and inn.

Uniquely situated on the Grand River overlooking the magnificent Elora Gorge, we provide country style lunches and French cuisine dinners all in a nostalgic, true Canadiana atmosphere.

Please call 1-866-5356 for reservations and inquiries about overnight accommodations, convention and banquet facilities!

FULLY LICENSED UNDER L.L.B.O.
MAJOR CREDIT CARDS ACCEPTED

Gripping live theatre provides a crucial dimension of University life. With its evident spirit of dedication, plus some imaginative consideration of how to reach or better employ the appealing facilities of LR, the Drama Club should become a central part of the campus cultural life. Perhaps those among us, faculty and students alike, who are obsessively concerned with the marketability of University students, might consider the usefulness of practical training in theatre, opera, arts management and so on, and press the administrators for a better space on campus (not to mention film!).

Still, what we got was a lot of value. Rita Huschka played "The Woman" with definitive energy and humor, and excellent timing. I would be fascinated to see her take a more substantial role. Dave Gent played The Manager with authority, although a few of his lines were lost in the commotion. Ian Roby and Donna Anstett played the minor roles effectively. Will Linzer was an enthusiastic director. If the blocking was a little wooden at times, the 45-minute production was appropriately provocative, and we should all be forward to find support for the Club's future performances.
...to be

**Upcoming Concerts**

**Toronto**

**November 30** — Moody Blues at Maple Leaf Gardens. Ticket with bus trip available at Record Neck. 

**December 1** — Craig Russell at Massey Hall. Musical director Paul Hoffert. 

**December 3** — Kate & Anna McGarrigle at Convocation Hall, University of Toronto. Two shows only 6:00 p.m. & 9:00 p.m. 

**December 7** — FM at Convocation Hall. Shows at 8:30 p.m. 

**Tickets $4.00 at all BASS outlets.**

**December 11** & 12 — Peter Hammill from Van Der Graaf Generation at Victoria Hall (across from WLU). 

**Tickets $5.00 at all BASS outlets.**

**December 26 to 31** — Mr. Downchild and The Big Band at the Mocambo, Spadina & College. All tickets available at BASS locations.

**Kitcheeer-Waterloo**

**December 20** — Rush at the Kitchener LAuditorium. 

**December 20** — The Good Brothers at Bingeman Park. 

**December 22** — Craig Russell at Massey Hall. Musical director Paul Hoffert. 

**December 27** — Mike & The Mechanics at Maple Leaf Gardens. 

**December 28** — Paul Simon at Maple Leaf Gardens. 

**December 29** — The Moody Blues at Maple Leaf Gardens. 

**December 30** — Ted Mancini at the U. 

**December 31** — The Moody Blues at Maple Leaf Gardens. 

**Kitcheeer-Waterloo**

CILR — Radio Laurier Nov. 26-Dec. 2

On Tuesday, Nov. 26th, at 6 p.m., say hello to Atlantic, a program that features the music and life of Atlantic John, plus our weekly feature, Sundays: Jazz and Classical from 8 p.m. to midnight. Monday's: 6:30-8:00 p.m. LCF presents the "Good News Hour," featuring contemporary Christian music. 6:30 to 8:00 p.m. Naal (Degenerate) Ottawa brings the latest in "New Music" (New Wave, Punk, Pop, etc.) 10:00 a.m. to 12:00, 7th Judge brings you music from our own WLU music dept. Thursday: 8:00 p.m.-10:00; Chinese Students Assoc. presents Chinese music and conversation. News and Sports daily at 10:00 a.m. and 5:00 p.m. "News from around the campus and around the world!"

CILR — RADIO LAURIER "VOICE OF THE HANDS"

Poet's Corner

Debbie's Place

My little apartment located on
4th.
The Board of Health labelled it — do not disturb. I'm counting the fences — a project for girls.
They say it's a trap — wait, I know the rats.
The ceiling is peeling in flypaper stripes.
We swim in the kitchen (the tap slightly drips),
The acoustics are great — the rock band next door.
Could only be labelled as terribly poor.
The floor's economic — it bulges and always
The view is just great — if you like city drums.
They don't give us cable, or heating or light.
For two hundred a month — the price is just right.

Eight Short Thought Poems

i'm blue
what's new?
despair comes with the dawn
happiness
a joyous feather
the wind whose
and the grass bends
square circle
circle square.
dull painted & all
cold wrote a all
brian sang & all
what's left for us to do?

Relationship

an available girl
but available for what?
I guess
what kind of love?
physical?
friendship?
affection?
pain?

Strict business arrangement
for one with emotional investments?
being liberating and open-minded is
all well and good
yet most of the time it
just means that there are
too many decisions to make of course
she can't ignore the fact that
liberation made the competition a lot stiffer
and it tends to scare the hell out of quite a few guys
maybe we should just put an ad
in the paper.

BODY FOR ART, SOUL NOT
INDIGENOUS. refuses
to suit?
do we give up our freedom so he
make the decisions?
or do we continue to
dress in eye-catching ways
casually but carefully check out
the prospects
and sit there
grinning on teeth through our
smiles when
the girl at the other table
gets all the dances?

Coffee in morn
beer at eve.
I am a good student of the wandering moon.

prayer
go or seen.

Todo 1-4

Women's B-Ball continued from page 14

Right now, the rookie is working on building up their confidence and aggressiveness around the basket. One can see the marked improvement already in their offensive game from their first game, which they won, and a win against Ryerson. This week, the emphasis during practice will be on offense.

We'll be looking forward to seeing our girls play, both defensively and offensively against Windsor and Toronto this Friday and Saturday respectively. We fall Laurier fans will be out there to give our Women's team that extra boost of confidence, won't we? After all, they do deserve it.

Yes, we do.

We'll be looking forward to seeing our girls play, both defensively and offensively against Windsor and Toronto this Friday and Saturday respectively. We fall Laurier fans will be out there to give our Women's team that extra boost of confidence, won't we? After all, they do deserve it.

**Hawk hoopers off to a good start**

**by John Kastner**

The Golden Hawks' chances of giving the Waterloo Warriors a run for the OUA-A Western Conference championship in men's basketball appeared to improve last Saturday night. The Hawks handed the Warriors a 66-60 loss in the final game of the WLU Invitational.

The Hawks had advanced to the final by downing the U of T Blues 78-70. Larry Labaj had 28 points the first night, as well as six key rebounds for the Hawks. Brock had gained a birth in the final by stopping pesky Brock Badgers 83-75. Brock narrowed the gap to within four with two minutes to go. Saturday night, before about 100 fans, the cross-town rivals put on a defensive display. Coach Don Smith played several zone defences against the Waterloo Warriors and they seemed to have trouble handling it. The T-Atlakinson makes players a little more hesitant to go inside and as a result, the opposition takes more shots from outside. If the outside shooters are off, then the zone defence works effectively. Such was the case Saturday—the big guns for Waterloo were cold—Hudson 4 for 11, and Edwards 3 for 12.

Coach Don Smith was quite pleased with his team's performance. The major question mark for the Hawks this year was their guards; they came up big and were able to shut down the fast break as well as being tough on your outside shooters. Special credit should go to McMillan, Heaver, and Horvath. Also pleasing was the fact the young Hawks stayed cool under pressure as the Warriors fought back a couple of times and threatened to take the lead. It would have been understandable if the young Hawks had folded, but they really hung together.

Barry Atkinson had 17 points in the first half and netted 24 for the night. Bob Fitzgerald had a big second half, with ten points and twelve over all. Fred Koecke came up big in the last few minutes. Koecke had six of his eight points in the last five minutes. Of the Hawks' last twelve points, Koecke had six.

Leon Passmore and Doug Vance had 14 each for the Warriors and pulled in ten rebounds Labaj was named the most valuable player for the tournament as a result.

The victory on the weekend followed an impressive offensive display by the Hawks last Wednesday against Ryerson Rams. The Hawks dumped the Rams 107-64. The Hawks had a balanced attack with six players getting into double figures. Orvil Clark led the way for the Hawks with 20 while Atkinson had 19. The game saw the starters get a lot of rest and therefore the game was an especially good way to start the season, allowing the bench strength to get some experience.

The Hawks had some problems with execution but nothing that cannot be explained by the fact that it was their first game of the year.

Robert Jones, a sharp player for Ryerson, had 24 points for the Rams, including their last eleven points.

The Hawks' next game is Friday afternoon against University of Winnipeg-Westmen at U of Waterloo. Game time is 1:00. This is part of the annual Naismith tournament.

With his height, newcomer Barry Atkinson will especially help the Hawks on the boards. He should also pump in his share of points.

**by John Kastner**

The Golden Hawks basketball team is off to a fast start, now boasting a record of 3-0. This has made Coach Don Smith feel good, because many of the experts predicted a long and rather tough season for the Hawks—that is still possible, but it seems less likely now. The Hawks are going to have a new look this year. Loren Eillon and Don Whaley, the superstars from the South, are gone and the Hawks will be dressing three fresh and three inexperienced sophomores this year.

Last year, Eillon and Whaley made up much of the Hawk offence. Killion broke two records last year and tied a third. He scored a total of 585 points for the season, had twenty field goals in one game (breaking Mike Marre's record), and also had 46 points against McMaster and scored 52 points at the Calgary Classic Tournament. Killion also averaged 31.9 points per game. Also missing from the Laurier line-up will be Don Whaley, who scored a total of 318 points as an average of 26.5 points per game.

Both have finished academic basketball. However, the Hawks have

Fred Koecke, the fifth leading scorer of all-time at WLU, has moved on to the University of Waterloo, where he is expected to help lead the Golden Hawks to a stronger season.

Veteran Larry Labaj, 14, won the MVP at the tournament and should have a good year. Fred Koecke (in background) is also a returning vet and a former national team member.

With his height, newcomer Barry Atkinson will especially help the Hawks on the boards. He should also pump in his share of points.

**VETERAN KILLION HEADS THE WAY**

GOLDEN WORDS

It's that time of year again! Time to dig in for the final stretch of school. Then it's off to Florida or the Bahamas or home. As soon as you know it, we'll be back again. January (2012, you'll be back on the second, but I sure as hell won't be.) Let's take a look now at the first semester in the world of Canadian University football.
WOMEN VOLLEYBALL START ROLLING

by Mark Wigmore

The trip to Peterborough brought more than memories of the scenic beauty in the Haliburton highlands to the Women's Volleyball team. It brought the first victories of the season. And as Cookie Leach said, "It's nice to be on the winning side of the scoreboard."

In the tournament at Trent, the Hawks won 3 matches and lost 2 to even their season record at 3 and 3. If the tournament had been a one-day, Saturday affair, perhaps the record would have been better.

On Friday night, with dreams of the Trent, exams, essays or something exciting dancing in their heads, they lost both matches. The only ones they would lose all weekend.

Against Laurentian, the team played its poorest of the tournament. It was a match we could have and should have won. Poor defense was one reason for the loss. Scores were 15-9, 15-17, 15-11.

Against a superior Ottawa team, the girls suffered defeat in a quick two games, 15-1, 15-2.

In the morning the girls woke up (both literally and figuratively) by defeating Ryerson, Carleton and Trent while losing only one game.

Against Ryerson, scores were 15-11, 15-12, against Carleton they were 15-11, 9-15, 15-10, and against Trent we won 15-2, 15-5.

Saturday was definitely a good day. The offense was good, the plays were working well and the defense improved throughout the tournament. All the players were able to play and therefore gain experience. Special mention goes to Nella Suchaczynski who blocked and played well until injuring her ankle. Also playing well were rookies Penny Greene and Nancy Saunders.

Next game is December 8 at Brock.

COULTHARD OPTIMISTIC ABOUT SEASON

by Gerry Huddleston

On Saturday November 18, the 1978-79 Men's Varsity Volleyball season got underway with Laurier hosting McMaster, Guelph and Brock. The season consists of a number of these minitournaments held at the different schools in the division. In front of a capacity crowd of about 15,000 Laurier met Brock in the first three games.

The Hawks were ready for Brock and handled them rather easily in the first game after gaining some momentum. In the second game, the Hawks moved into a gigantic lead only to see it slowly slip down the drain. The result: the first loss of the season.

We must attack more. 5. Serve reception has improved. 6. The hiring is getting better every time we play.

Veteran Mike Crossman goes high to block a Mac spike while Drew Martin and Eric Yap anticipate a loose ball.

Eric Yap showed his all-round talent on Saturday and should emerge as the team leader.

QUICK SETS The play of Eric Yap and Bill Pratt will definitely help the Hawks in the future. Eric was the best all round player for us and played super ball all day. At times Mike Crossman and Ralph Gutland played extremely well and if they can develop some consistency they could settle the young players down. If not, its going to be a long season. It's no doubt that we are in the strongest division in Canada and we can't expect miracles from our young team. However, if they practice hard and develop a winning attitude we will be competitive. If we can keep our team together for a couple of years, LOOK OUT WORLD CHAMPIONSHIPS!!!
Hawks vs. Michigan

by Joe Veit

The Golden Hawks hockey team spent this past weekend participating in a two game exhibition series against Western Michigan University. Though they came out on the short end of the mark losing 4-3 Friday and 3-2 Saturday night, they supplied the three thousand plus boisterous spectators with plenty of exciting hockey to watch.

On Friday night the Hawks were set back from 2-1 at the end of the first period on goals by defenceman Mitch Edwards and Brian Croomes. However Michigan came out like a ball of fire to start the second period scoring at the six second mark. The score remained tied at two for two of the period. Then at the midway mark of the period Michigan scored two goals. With time running out the Hawks pulled the stick losing 4-3 Friday and 3-2 Saturday night.

Veteran Debbi Wenszell gives the Hawkettes the scoring punch that is needed to improve last year's record. With a taller team this year and good coaching, up is the only way to go!

Women's Basketball

by Jane Ellenor

Last weekend's basketball games against York and Carleton may not be termed "victories", but they certainly were accomplishments. The key word which was brought to mind while watching the women's competition was "improvement". One is forced to the opinion that the Hawkettes can be considered (as they consider themselves) serious, capable and potential contenders in their league.

Losing their league game on Saturday by a class 46 to 41, Laurier (population 3,000) showed that they were equal to the abilities of York (population 12,000). It took a while for either team to get going and a basket 4 minutes in fact - but that was due to the strong defense of both universities. The tightly knit guarding of the baskets led to a somewhat "hard-hitting" ball game, but to break into the key and score those points, one must be aggressive and take chances. Laurier, as well as York, did just that. They took chances, forced the issue at the net, and consequently got charged with many fouls. Yet that is one part of the game, if you are impeded in shooting for the basket, you are entitled to free throws to make up the difference. Laurier showed their excellence at the line by sinking 16 of 20 free shots in the first half alone.

At one point in the game, the score was 15 to 7 in favour of York. In the ensuing minutes, Laurier evened the score 15-15. This demonstrates the fact that the girls are beginning to move, to anticipate, and to block their opposition. It is obvious that Laurier had many more turnovers of the ball than did York, and used those breaks to advantage.

The 2nd half saw a more strategic and less "violent" game than the first 20 minutes. Their passes were off, the players were breaking from their guards and cutting across the key, and all this added up to more chances for shooting at the basket. 18 points were scored on jump shots while only 3 points were derived from free throws in this half. Unfortunately, the Hawkettes were hampered in their drive to a victory by the fact that 3 key players were fouled out of the game.

With a minute and half left, and 4 points behind, Carleton was finding it hard to keep its momentum up and used those few shots that were on offer. The final score was a deceptive 57-28 for Carleton.

Attention: If you want to see a super hockey game, head down to the Kitchener Audiorium at 7:00 this Saturday to watch our Golden Hawks take on the Western Mustangs. It promises to be a barn stormer, for the Mustangs will be "needing sweet revenge" after their humiliating 9-0 bombing by our Hawks in the last meeting between these two teams. No doubt our Hawks will be up for this one too, to prove that their pasting of the Mustangs was not a mere fluke. I know it's going to be a great game so be there and bring your vocal chords.
Hume leads our wrestlers

Wrestling is a sport at Laurier that doesn’t receive much recognition. It is in fact the hardest sport at the varsity level and is the most physically demanding. As everyone knows, varsity wrestling does not consist of drop kicks or tag teams, but rather one on one situation. The Laurier program (it is now a major sport) consists of approximately six wrestlers but, Coach, Steve Scully, is recruiting new men.

The most successful wrestler on our team in the past and almost certainly in the future is big Pete Hume. Pete is a towering 6’9” and tips the scale at 355. Big Pete’s record speaks for itself with his Bonnie and Silver at the Canadian Championships, CIAU Champion last year, Ontario Freestyle champion, Ontario Greco-Roman Champion, finished 4th in Bulgaria at the World Student Games in ’77 and won 2 Bronze medals at Mexico in the Sr. Pan-Am games in ’77. In Bulgaria, Pete won 2 matches and lost 2 (one was to the silver medalist at the Olympic games in Montreal).

In a conversation with Pete last week, he told me that he had started to wrestle as an alternative to football in his second year at Laurier. Pete says that he wrestles because of the personal satisfaction. “When I win, it’s me and when I lose, it’s me! I don’t have to rely on anyone but myself. I find wrestling has got me to see the world and it’s free. It’s a growing sport and to me, it has been harder than football.”

Coaching is very important to a wrestler and former coach, Dave Johnston is responsible for teaching Pete the techniques. Also, present coach, Steve Scully has sparred with Pete and taught him some moves. Steve Scully was a good wrestler himself, and represented Canada in the Montreal Olympics. Pete has set two goals for himself—to be the Canadian Champion, and to represent Canada in the 1980 Olympics in Russia.

At the present time, big Pete is a carded athlete as selected by a National Committee. This represents a lot of financial help and can give Canadian athletes like Pete a big boost. Competition at the international level is understandably difficult and the opponents are big and knowledgeable. His size is definitely a psychological advantage, and with his increasing knowledge as taught by men like Johnston and Scully, the sky is the limit.

These are the wrestlers on our team so far this year. L. to R. — Rob Jones, Dave O’Brien, Steve Scully (Coach), Bruce Harding, Grant Jung, and Pete Hume. Absent is Harry Brown.

Coming soon—action photos of our wrestlers. Lack of space this week prohibits them in this issue.

For further information call Morris Ilniak ext. 3880 or Connie Clement ext. 2578
In this issue:
- Boar's Head coming up
- Men's B Ball tourney
- Madcats at U of W
- Parking problems and other serious stuff...

... until the joke next week
